

Merchant Dashboard - Feature Specification

Confidential - Internal Use Only

Version 1.0

1. Dashboard Overview

The merchant dashboard provides real-time visibility into transaction volume, revenue, and disputes.

REQ-ECO-042: Dashboard must display today's transaction count, total revenue, and success rate.

REQ-ECO-043: Interactive charts must show daily/weekly/monthly trends with drill-down capability.

REQ-ECO-044: The dashboard must support data export to CSV, PDF, and Excel formats.

2. Transaction Management

REQ-ECO-045: Merchants must be able to search transactions by ID, amount, date range, and status.

REQ-ECO-046: Transaction detail view must show full lifecycle (auth, capture, settle, refund).

REQ-ECO-047: Bulk actions (refund, export) must be available for selected transactions.

3. Merchant Onboarding

REQ-ECO-048: Self-service onboarding with KYC document upload and verification.

REQ-ECO-049: API key generation and sandbox environment provisioning within 5 minutes.

REQ-ECO-050: Onboarding wizard must guide merchants through integration steps.

4. Reporting and Analytics

REQ-ECO-051: Automated daily settlement reports emailed to merchant finance contacts.

REQ-ECO-052: Custom report builder with filters for date, currency, payment method, and status.

REQ-ECO-053: Revenue forecasting based on historical transaction patterns.
