

E-Commerce Payment Gateway - UI/UX Wireframe Specification

Confidential - Internal Use Only

Version 1.0

1. Hosted Checkout Page Layout

REQ-ECO-054: The checkout page shall use a single-column centered layout (max-width 480px) with a white card container on a light-gray (#F5F5F5) background.

REQ-ECO-055: The card number field shall be 340px wide with a 16px left-padding. A card brand icon (Visa/MC/Amex) shall appear as a 24x24px SVG at the right edge of the field, updating in real-time as the user types.

REQ-ECO-056: Expiry (MM/YY) and CVV fields shall sit side-by-side on a single row below the card number field, each occupying 50% width with 8px gap.

REQ-ECO-057: The 'Pay Now' button shall be full-width, 48px height, with brand-configurable background color (default: #4CAF50), white 16px semi-bold text, and 8px border-radius.

REQ-ECO-058: Inline validation errors shall appear as 12px red (#D32F2F) text directly below the offending field within 300ms of blur event. A red 2px border shall replace the default gray (#BDBDBD) border on the field.

REQ-ECO-059: On mobile viewports (<576px), the checkout card container shall expand to 100% width with 16px horizontal padding and the form fields stack vertically.

2. Merchant Dashboard - Overview Screen

REQ-ECO-060: The dashboard overview shall display four KPI summary cards in a horizontal row: 'Today Revenue' (currency formatted), 'Transactions' (count), 'Success Rate' (percentage with green/red indicator), and 'Avg Transaction' (currency).

REQ-ECO-061: Each KPI card shall be 240px wide, 120px tall, with a subtle box-shadow (0 2px 8px rgba(0,0,0,0.1)), 12px border-radius, and a left-side 4px accent color bar (green for positive trend, red for negative).

REQ-ECO-062: Below the KPI row, a line chart (Chart.js) shall occupy full width showing transaction volume over the selected time range. The chart must support hover tooltips displaying exact values and a legend toggling between 'Volume' and 'Revenue' datasets.

REQ-ECO-063: The time-range selector shall be a segmented control with options: Today, 7 Days, 30 Days, 90 Days, Custom. Custom triggers a date-range picker overlay.

3. Transaction Detail Modal

REQ-ECO-064: Clicking a transaction row opens a right-side slide-over panel (400px wide, full-height) with transaction lifecycle displayed as a vertical stepper: Authorization -> Capture -> Settlement or Refund.

REQ-ECO-065: Each stepper node shows timestamp, status badge (green 'Success', red 'Failed', yellow 'Pending'), and relevant metadata (auth code, processor response).

REQ-ECO-066: The panel footer contains action buttons: 'Refund' (outlined red), 'Export Receipt' (outlined gray), and 'Close' (text button). The Refund button opens a confirmation dialog with amount field defaulting to full transaction amount.

4. Merchant Onboarding Wizard

REQ-ECO-067: Onboarding follows a 4-step wizard with a horizontal progress bar at the top: Step 1 Business Info, Step 2 KYC Documents, Step 3 Bank Details, Step 4 Review & Submit.

REQ-ECO-068: Each step has a 'Back' (text button, left-aligned) and 'Continue' (primary button, right-aligned) in the footer. Step 4 replaces 'Continue' with 'Submit Application' (green primary button).

REQ-ECO-069: Document upload in Step 2 uses a drag-and-drop zone (dashed 2px border, #90CAF9 color) with accepted formats (PDF, JPG, PNG) displayed below. Progress bar appears during upload with percentage and file size.
