

E-Commerce Payment Gateway - Test Strategy v1.0

Confidential - Internal Use Only

Version 1.0

1. Test Approach

Testing follows a risk-based approach with focus on payment accuracy, security, and performance.

Test levels: Unit (Jest), Integration (Postman/Newman), E2E (Cypress), Performance (k6), Security (OWASP ZAP).

2. Test Environments

Sandbox: Simulated card networks with test card numbers.

Staging: Connected to test endpoints of Visa/Mastercard.

Pre-prod: Mirror of production with anonymized merchant data.

3. Entry/Exit Criteria

Entry: All code reviewed, unit test coverage > 80%, no P1 defects open.

Exit: All critical test cases passed, performance benchmarks met, security scan clean.
