

Digital Banking App - Non-Functional Requirements v1.0

Confidential - Internal Use Only

Version 1.0

1. Performance Requirements

NFR-FIN-001: App cold launch to home screen < 3 seconds on iPhone 12 and equivalent Android.

NFR-FIN-002: Transaction list scroll must maintain 60fps with no jank for 1000+ transactions.

NFR-FIN-003: P2P transfer end-to-end processing (initiate to confirmation) < 5 seconds for FedNow.

NFR-FIN-004: Investment portfolio refresh with live prices < 2 seconds during market hours.

NFR-FIN-005: Push notification delivery latency < 500ms from transaction authorization.

2. Scalability & Capacity

NFR-FIN-006: Backend must handle 50,000 concurrent API sessions during peak (payday Friday).

NFR-FIN-007: Transaction processing capacity: 5,000 TPS for card authorizations.

NFR-FIN-008: Investment order routing must handle 10,000 orders per minute during market open.

NFR-FIN-009: Notification service throughput: 100,000 push notifications per minute.

3. Security & Regulatory Compliance

NFR-FIN-010: PCI DSS Level 1 certification required for card data handling. Annual audit by QSA.

NFR-FIN-011: SOC 2 Type II compliance for all cloud infrastructure. Annual audit.

NFR-FIN-012: BSA/AML (Bank Secrecy Act) compliance: automated transaction monitoring, CTR filing for cash transactions > \$10,000.

NFR-FIN-013: Reg E compliance: unauthorized transaction claims processed within 10 business days. Provisional credit within 10 days.

NFR-FIN-014: FDIC insurance disclosure prominently displayed. Deposits insured up to \$250,000.

4. Availability & Disaster Recovery

NFR-FIN-015: Core banking services uptime SLA: 99.99% (max 4.3 minutes downtime per month).

NFR-FIN-016: Multi-region AWS deployment (us-east-1 primary, us-west-2 DR). Active-passive failover with RTO < 5 minutes, RPO < 30 seconds.

NFR-FIN-017: Card authorization service must be available 24/7/365 with independent failover to prevent card decline during outages.

NFR-FIN-018: Quarterly disaster recovery drills with full failover test and documented results.

5. Mobile App Requirements

NFR-FIN-019: iOS minimum: iOS 15. Android minimum: Android 10 (API 29). App size < 50MB.

NFR-FIN-020: Offline mode: view cached balance and recent transactions. Banner displayed indicating data staleness.

NFR-FIN-021: Accessibility: VoiceOver and TalkBack support for all screens. Dynamic type support on iOS.

NFR-FIN-022: Deep linking support for push notifications to navigate directly to relevant screen.
