

Telehealth Integration - Feature Specification

Confidential - Internal Use Only

Version 1.0

1. Video Consultation

- REQ-HCP-019: Integrated video consultation using Zoom Healthcare API with HIPAA BAA.
- REQ-HCP-020: Virtual waiting room with estimated wait time and position in queue.
- REQ-HCP-021: Screen sharing capability for providers to review lab results with patients.
- REQ-HCP-022: Video quality must auto-adjust based on bandwidth (minimum 720p when possible).
- REQ-HCP-023: Recording capability with patient consent, stored encrypted for 3 years.

2. Remote Monitoring

- REQ-HCP-024: Integration with wearable devices (Apple Watch, Fitbit) for vitals data.
- REQ-HCP-025: Automated alerts when patient vitals exceed provider-configured thresholds.
- REQ-HCP-026: Dashboard for providers showing remote monitoring data trends per patient.

3. Virtual Triage

- REQ-HCP-027: Symptom checker chatbot to guide patients to appropriate care level.
- REQ-HCP-028: Triage results shared with provider before consultation for preparation.
- REQ-HCP-029: Emergency symptoms must trigger immediate alert with 911 contact option.
