

Patient Management Portal - User Workflow & Journey Maps

Confidential - Internal Use Only

Version 1.0

1. New Patient Registration & First Appointment

Workflow WF-HCP-001: New Patient Onboarding

Step 1: Patient clicks 'Create Account' on portal landing page. Registration form: First Name, Last Name, Date of Birth, Email, Phone, Create Password.

Step 2: Email verification link sent. Patient clicks link within 24 hours to activate account.

Step 3: Patient completes profile setup: Insurance information (carrier, group number, member ID), pharmacy preference, emergency contact, communication preferences.

Step 4: System runs real-time insurance eligibility check via EDI 270 transaction. Results (co-pay, deductible status) stored in patient profile.

Step 5: Patient navigates to 'Book Appointment' and selects provider/specialty/date/time.

Step 6: Pre-visit forms auto-populated based on profile. Patient reviews, signs consent forms electronically.

Step 7: Automated reminders sent: 48 hours before (email), 2 hours before (SMS with check-in link).

Step 8: On appointment day, patient checks in via the portal or kiosk. Wait time estimated and displayed.

Alternate Path AP-1: If insurance eligibility check fails, patient prompted to verify insurance details or self-pay option offered.

Alternate Path AP-2: If patient no-shows, appointment marked as 'No Show' with configurable no-show fee applied after 3 occurrences.

2. Telehealth Video Consultation Flow

Workflow WF-HCP-002: Telehealth Visit End-to-End

Step 1: Patient logs in, navigates to scheduled telehealth appointment, clicks 'Join Video Visit'.

Step 2: Pre-consultation device check screen validates camera, microphone, and speaker. Browser permissions requested if not granted.

Step 3: Patient enters virtual waiting room. Queue position and estimated wait displayed. Symptom checker chatbot available during wait.

Step 4: Provider joins, patient and provider connected in HIPAA-compliant Zoom session. Visit timer starts.

Step 5: Provider reviews patient chart (demographics, medications, allergies, recent lab results) on split screen during consultation.

Step 6: Provider documents visit notes in real-time using structured clinical note templates (SOAP format: Subjective, Objective, Assessment, Plan).

Step 7: Provider enters orders: lab tests, prescriptions (via Surescripts), referrals, follow-up appointment.

Step 8: Visit ends. Auto-generated visit summary sent to patient via secure message within 1 hour.

Step 9: Patient receives after-visit survey via email. Rating (1-5 stars) and comments stored for quality reporting.

Error Path EP-1: If video drops, system attempts auto-reconnect 3 times. After 3 failures, both parties notified with option to reschedule or switch to phone.

3. Prescription Refill Flow

Workflow WF-HCP-003: Patient-Initiated Prescription Refill

Step 1: Patient navigates to Prescriptions tab, views active medications list with: Medication Name, Dosage, Frequency, Prescribing Provider, Refills Remaining, Last Filled Date.

Step 2: Patient clicks 'Request Refill' on a medication. System checks refill count. If refills remaining > 0, request sent directly to pharmacy via Surescripts.

Step 3: If no refills remaining, refill request sent to prescribing provider as a task in their inbox.

Step 4: Provider reviews request, patient history, and last visit notes. Provider approves, modifies, or denies with reason.

Step 5: If approved, e-prescription sent to patient's preferred pharmacy. Patient notified: 'Prescription sent to [Pharmacy Name].'

Step 6: Pharmacy fills prescription and sends fill confirmation back via Surescripts. Patient sees 'Ready for Pickup' status.

Decision Point DP-1: If medication is a controlled substance, additional verification required (in-person visit or telehealth within last 90 days).

4. Insurance Claim & Billing Flow

Workflow WF-HCP-004: Visit to Bill Payment Lifecycle

Step 1: After visit, charge entry is completed by coding team: CPT codes, ICD-10 diagnosis codes, units, modifiers.

Step 2: System auto-generates EDI 837 Professional claim and submits to patient's insurance payer.

Step 3: Claim acknowledgment received (EDI 997). Claim enters 'Submitted' status. Average adjudication: 14-30 days.

Step 4: EOB (Explanation of Benefits) received from payer via EDI 835. Insurance paid amount and patient responsibility calculated.

Step 5: Patient statement generated: Service Date, Description, Billed Amount, Insurance Adjustment, Insurance Paid, Patient Balance.

Step 6: Statement emailed to patient and posted to Billing section of portal. Patient receives push notification.

Step 7: Patient pays online or sets up payment plan. Receipt emailed and stored in billing history.

Error Path EP-2: If claim is denied, denial management workflow triggers: Auto-generates appeal letter template, assigns to billing team queue, tracks appeal deadline (typically 60-90 days).
