

Patient Management Portal - Test Strategy v1.0

Confidential - Internal Use Only

Version 1.0

1. Test Approach

HIPAA compliance testing is mandatory for all features handling PHI.

Security penetration testing conducted quarterly by third-party firm.

Accessibility testing per WCAG 2.1 AA standards using axe-core.

2. Test Data Management

All test data uses synthetic patient records - no real PHI in test environments.

Test data generated using Synthea patient generator for realistic scenarios.
