

Supply Chain Logistics Manager - UI/UX Wireframe Specification

Confidential - Internal Use Only

Version 1.0

1. Shipment Dashboard Screen

REQ-LOG-040: Dashboard header shows KPI summary bar: Total Active Shipments (count), On-Time Rate (percentage with green/red indicator), Shipments Today (count), Exceptions (count with red badge). KPI cards are 200px wide, 100px tall with 24px bold value and 12px label.

REQ-LOG-041: Below KPIs, a full-width data table lists active shipments with columns: Tracking # (link), Origin City, Destination City, Carrier (logo icon + name), Status (color-coded badge), ETA, Customer Name. Table supports sorting, filtering, and pagination (25/50/100 rows per page).

REQ-LOG-042: Bulk action toolbar above table when rows are selected: 'Update Status', 'Print Labels', 'Assign Carrier', 'Export CSV'. Selected row count shown (e.g., '12 shipments selected').

REQ-LOG-043: 'Create Shipment' primary button (#1976D2, top-right) opens a multi-step wizard: Step 1 - Origin/Destination, Step 2 - Package Details, Step 3 - Service Selection, Step 4 - Review & Submit.

REQ-LOG-044: Left sidebar navigation (220px wide, dark navy #0D1B2A): Dashboard, Shipments, Tracking Map, Warehouse, Route Planner, Customs, Carriers, Reports, Settings. Active item with left-border accent and bold text.

2. Live Tracking Map Screen

REQ-LOG-045: Full-screen Google Maps integration with custom markers: truck icons color-coded by status (green = In Transit, blue = Out for Delivery, red = Exception, gray = Delivered). Cluster markers when zoomed out.

REQ-LOG-046: Map sidebar panel (360px wide, collapsible) shows shipment details on marker click: tracking number, origin/destination, carrier, current location, last scan timestamp, ETA, and status timeline.

REQ-LOG-047: Geofence visualization: colored polygons on map showing warehouse zones, delivery zones, and restricted areas. Hover shows zone name and alert rules.

REQ-LOG-048: Map filters bar at top: carrier dropdown (multi-select), status checkboxes, customer search, date range. 'Refresh' button with last-update timestamp. Auto-refresh toggle (30-second interval).

3. Warehouse Floor Plan Screen

REQ-LOG-049: Interactive SVG floor plan showing warehouse zones: Receiving, Storage (A/B/C aisles), Packing, Staging, Shipping. Each zone clickable to show inventory count and active workers.

REQ-LOG-050: Heat map overlay showing zone utilization: green (< 60%), yellow (60-85%), red (> 85%). Legend in bottom-right corner.

REQ-LOG-051: Active pick lists displayed as cards in right panel: Order Number, Items (count), Assigned Worker, Status (Picking/Packing/Ready). Progress bar showing items picked vs. total.

REQ-LOG-052: Bin location search (top of warehouse view): enter SKU or bin ID, matching bins highlighted on floor plan with flash animation.

4. Carrier Rate Shopping Screen

REQ-LOG-053: Rate comparison table with columns: Carrier (logo + name), Service Level, Transit Days, Base Rate, Fuel Surcharge, Total Cost, Reliability Score (stars). Sorted by best value

(default) or cheapest/fastest toggle.

REQ-LOG-054: Shipment details summary at top: origin · destination, weight, dimensions, package count. 'Edit' button to modify and recalculate rates.

REQ-LOG-055: Rate history chart (expandable): shows 90-day price trend for selected lane with carrier comparison lines. Helps identify pricing patterns.

REQ-LOG-056: 'Book Shipment' button next to each carrier row. Booking confirmation modal confirms rate lock period (typically 30 minutes), generates label, and creates tracking number.

5. Analytics & Reporting Screen

REQ-LOG-057: Executive dashboard with 4 main charts: Shipment Volume (bar chart, daily/weekly/monthly), On-Time Delivery Rate (line chart with target line), Cost per Shipment (trend line), Carrier Performance (grouped bar chart).

REQ-LOG-058: Interactive filters: date range picker, carrier multi-select, customer multi-select, origin/destination region. All charts update in real-time as filters change.

REQ-LOG-059: Drill-down capability: clicking any chart data point opens filtered shipment list. Breadcrumbs show drill-down path for navigation back.

REQ-LOG-060: Export reports as PDF (formatted) or CSV (raw data). Scheduled report email delivery: daily, weekly, or monthly to configurable recipient list.
