Target end:	Tue Mar 24 00:00:00 EDT 2026
Enabler:	
Benefit Hypothesis:	This provides customers with the ability to directly view key metrics for their selected NAG, offering immediate insight and support for account management. It reduces the effort required to understand the overall status of their subscriber base and billing structure.
Acceptance Criteria:	1. GIVEN a user is on the Wireless Dashboard, THEN four metric tiles are displayed: "Billing Accounts", "Active Subscribers", "Suspended Subscribers", and "Cancelled Subscribers". 2. GIVEN a user selects a specific NAG from the header filter, THEN the counts displayed in all four metric tiles update to accurately reflect the data for that selected NAG. 3. WHEN the "Billing Accounts" tile is clicked, THEN the user is redirected to the 'advanced search' view of the "Mobile Devices and Plans - BAN Page", where the Group (NAG) search field is pre-populated and the corresponding results are immediately displayed.

4. **WHEN** the "Active Subscribers" tile is clicked, **THEN** the user is redirected to the '**advanced search**' view of the "Mobile Devices and Plans - Subscriber Page", where the Group (NAG) and "Active" status fields are pre-populated and the corresponding results are immediately displayed.
5. **WHEN** the "Suspended Subscribers" tile is clicked, **THEN** the user is redirected to the '**advanced search**' view of the "Mobile Devices and Plans - Subscriber Page", where the Group (NAG) and "Suspended" status fields are pre-populated and the corresponding results are immediately displayed.
6. **GIVEN** the "Cancelled Subscribers" tile, **THEN** its count accurately reflects the number of subscribers cancelled within the last 12 months for the selected NAG.
7. **WHEN** the "Cancelled Subscribers" tile is clicked, **THEN** the user is redirected to the '**advanced search**' view of the "Mobile Devices and Plans - Subscriber Page", where the Group (NAG) and "Cancelled" status fields are pre-populated and the corresponding results are immediately displayed.

Seed Stories:

Story 1 (Widget Display & Data Binding): As an account manager, I want to see four summary tiles on my dashboard that display accurate counts for Billing Accounts, Active, Suspended, and Cancelled subscribers for the NAG I have selected, so I can get a quick inventory overview.

Story 2 (Cancelled Subscriber Logic): As a user, I want the "Cancelled Subscribers" count to specifically show me the total from the last 12 months, so I can track recent churn.

Story 3 (Click-through to BANs): As a user, I want to click the "Billing Accounts" tile and land on the advanced search page where the NAG is pre-filled and the list of matching BANs is immediately displayed, so I can see both the criteria and the results without extra clicks.

Story 4 (Click-through to Subscribers): As a user, I want to click the "Active", "Suspended", or "Cancelled" tiles and land on the advanced search page where the NAG and status are pre-filled and the matching subscriber list is immediately displayed.

Story 5 (Enabler - Advanced Search Enhancement): As a user of the advanced search pages, I want a new search field for "Group (NAG)" on both the "BAN Page" and "Subscriber Page", so that I can filter results by a specific group.

Summary (from PM): Summary (from PM): This feature introduces a set of high-level inventory widgets (or "Metric Tiles") on the Wireless Dashboard. For the Group (NAG) selected in the page header, this section will display four key metrics. Each widget is clickable, redirecting the user to an **advanced search view** where the relevant criteria are pre-populated in the search fields and the search is automatically executed, displaying the detailed results immediately for a seamless experience.

Dependency Note: This feature requires the addition of a new "Group (NAG)" filter field to the advanced search views on the "Mobile Devices and Plans - BAN Page" and the "Mobile Devices and Plans - Subscriber Page". This work is captured in Story 5.

Mockups (from UX): Please refer to the approved UX designs in Figma for the visual layout, styling, and placement of the inventory widgets.

Comments
Padmanathan, Jacintha added a comment - 05/Nov/25 4:19 PM Beaudoin, Olivier Villemin, Maxime Paul who is looking into this feature
Beaudoin, Olivier added a comment - 10/Nov/25 3:36 PM Refinement sessions planned this week
Villemin, Maxime Paul added a comment - 18/Nov/25 10:59 AM Feature moved back to analysis. In My Inventory, in the Subscriber list, we currently do not have a UX component to select only subscriber cancelled in the last 30 days. Discussion ongoing with Business and BCIM team
Beaudoin, Olivier added a comment - 27/Nov/25 11:17 PM Need alignment for 'Cancelled Subscribers' Widget. Email sent

Hi team,

As part of the analysis by the System Architect and the BCIM team, we've identified a technical constraint that impacts the current design for this feature: [BBMOMNI-5101](#) PTW - BBSSC - Wireless Dashboard - Inventory Widgets (NAG Metric Tiles) - DOQ JIRA

**

Current Requirement: The "Cancelled Subscribers" widget should display a count of subscribers cancelled within the **last 30 days**.

Issues:

1. **Data Availability:** The deactivation date, which is required to calculate a "last 30 days" total, is not available in the inventory data source ("Mobile Devices and Plans" page).
2. **System Behavior:** BBSSC retains all cancelled subscriber records for a period of **12 months**.
3. **User Experience:** This creates a mismatch. The widget would show a 30-day count, but when a user clicks it, the resulting subscriber list would display all cancelled subscribers from the last 12 months. This inconsistency between the summary tile and the detailed view could be confusing for the user.

Proposed Solution: To align with the available data and ensure a consistent user experience, we propose updating the logic for this widget.

- **Change From:** Displaying cancelled subscribers from the "last 30 days".
- **Change To:** Displaying cancelled subscribers from the **"last 12 months"**.

Why:

- **Technically Feasible:** This aligns with our system's data retention and capabilities.
- **Consistent UX:** The widget's count will now match the number of records shown on the click-through detail page, avoiding user confusion.

[@Sharma, Dakshya](#)  [@Julian, Jennifer](#)  and [@Zambrano Lievano, Mauricio](#)  Please let us know if you are aligned with this change and I will update the feature accordingly. We will then be able to complete the analysis.

Beaudoin, Olivier added a comment - 11/Dec/25 3:03 PM

Alignment received. Feature updated. We will be displaying cancelled subscribers from the **"last 12 months"**.

Analysis can be completed [Villemin, Maxime Paul](#) /[Duhoux, Vincent](#)

Padmanathan, Jacintha added a comment - 17/Dec/25 10:50 AM

[Bourcier, Benoit](#) appreciate if you could please have this refined.

Bourcier, Benoit added a comment - 19/Dec/25 9:38 AM

Pending analyzing :

A GAP with the NAG filter for the tiles have been identified and we need to further investigate it

CC [Villemin, Maxime Paul](#)

Beaudoin, Olivier added a comment - 05/Jan/26 2:43 PM

Olivier to engage [Zambrano Lievano, Mauricio](#) to add NAG filter on mobile devices and plans page

Padmanathan, Jacintha added a comment - 09/Jan/26 12:05 PM

[Beaudoin, Olivier](#) I think feature was to be in analysis complete and refined by today

Padmanathan, Jacintha added a comment - 12/Jan/26 3:40 PM

[Villemin, Maxime Paul](#) ; [Bourcier, Benoit](#) why is this feature being pushed to P12 Program EPIC was created in sept 2025.
[Balasubramanian, Vinod](#) [Manseur, Malik](#) [Tomasevic, Nikola](#)

Beaudoin, Olivier added a comment - 12/Jan/26 3:55 PM

[Villemin, Maxime Paul](#) [Bourcier, Benoit](#) feature updated to:

- reflect the new 'Group' search field on the "Mobile Devices and Plans - Subscriber Page" + "Mobile Devices and Plans - BAN Page".
- Also clarified the search behaviour to remove ambiguity (advanced search view + pre-population + results display immediately)

Mockup was also updated by Mauricio.

Moving to Analysis completed and tagging to P11. [Bourcier, Benoit](#) can you please update your stories and update the feature the Refined after?
