Clarifications - WIP

1.  
a

Data units required -

- Colour coding usage type into one graph
- i.e minutes, messages, MB/GB

Answer:

- Wireframe + requirements finalized July 15th. Information is reflected.

1.  
b

Time period filtering of data of unbilled usage of unbilled usage

- Is daily / weekly and the monthly capture require to provide comparisons ?

Answer:

- No daily/weekly separate capture of dashboard's **unbilled usage**.
- Dashboard sees only **monthly** view
  - Unbilled: Start of bill cycle to login period
  - Billed: Previous month(s) capture of customer's billed usage
- **Ability to drill down to specific customers from dashboard - this is where existing functionality of daily/weekly will exist**

1.  
c

User roles and permissions.

- Usage access is main guidance towards Dashboard's view.
  - If usage is available to user, the dashboard populates by default.
  - If usage is not defined within the rules for user, the dashboard should not be shown.

This has been further drilldown regarding NAG vs BAN view of Self-serve Mobility Usage.

- [RE\\_PTW - NAG Filter \\_ Permissions & Roles Discussion .msg](#)

Users who have mydashboard-view or mydashboard-manage. Out of those users - who has my inventory manage and mobility usage:
