

[BBMSA-13025] McDonalds - CR8 Custom McDonald Catalog

Created: 20/May/25 4:10 PM - Updated: 27/Jan/26 11:20 AM - Resolved: 27/Jan/26 11:20 AM

Status: Ready For Release
Project: BBM Service Assurance ART
Component/s: None
Affects Version/s: None
Fix Version/s: None
Security Level: For Internal Use

Type:	Feature	Priority:	High
Reporter:	Lacroix, Louise	Assignee:	Mandavilli, Swetha
Resolution:	Done	Votes:	0
Labels:	CSAP, MS_SP		
Original Estimate:	Not Specified		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		

Acceptance Criteria:

1. 1. Reorganisation of offering following file all will under existing customized catalog MCD
 1. Show **offers datavalet tagged as "Meraki Wi-Fi" only** under "Managed Services" "Bell Managed Services for Cisco Meraki" "Wi-fi"
 2. Show offers Datavalet tagged as "MIS Battery (NSMIS)" **only** under "Managed Services" **"Managed Infrastructure Services"** "Power supplies or battery backup" (*best naming to define ATS / UPS by UX for customer*)
 3. Do not show the other existing offers anywhere else
 4. Respect filter that Datavalet offering will only show on CI page device managed by DATAVALET
 5. Any existing structured form will work as is
 6. New offering : Modify profile / template
 1. Taxonomie dispatcher
 1. "Managed Services" "Bell Managed Services for Cisco Meraki"
 2. "Wi-fi"
 3. Action "Modify"
 2. Form
 1. CI selection must show only CI managed by Datavalet
 2. Admin page
 3. CI section page
 4. Standard page with hove offer text to identify expected details - TBD
 5. Due date selection page
 3. Rate categorie : waiting for Datavalet
 4. SLA : depends on rate categorie
 5. Classification : new to be created by maximo
 6. Process with BBSSC and API : MACD same as DV-002
 7. Type : minor
2. New offering : Create new profile / template
 1. Taxonomie dispatcher
 1. "Managed Services" "Bell Managed Services for Cisco Meraki"
 2. "Wi-fi"
 3. Action "Add"
 2. Form
 1. CI selection must show only CI managed by Datavalet
 2. Admin page
 3. CI section page

4. *Standard page with have offer text to identify expected details - TBD*
5. *Due date selection page*
3. Rate categorie : waiting for Datavalet
4. SLA : depends on rate categorie
5. Classification : new to be created by maximo
6. Process with BBSSC and API : waiting for Datavalet
7. Type : minor
3. Adjust offering name for Mcdo and all on DV-047 to show "Ad Hoc report or dashboard customization"
4. Internal use offer (must not show in BBSSC)
 1. WAN Site/Hardware decommission (with Physical Removal from Bell) : DV-043
 2. Add a new managed element - new location : DV-046
2. Bell Managed Services for Cisco Meraki - **Customer need to see all the MANAGED LAN and MANAGED WAN offering. in addition of the following requirement**
 1. Respect filter that Bell offering will **NOT** show on CI page device managed by DATAVALET
 2. New offering : Modify profile / template
 1. Taxonomie dispatcher
 1. "Managed Services" "Bell Managed Services for Cisco Meraki"
 2. "Bell Managed WAN" and "Bell Managed LAN"
 3. Action "Modify"
 2. Form
 1. *CI selection must NOT show CI managed by Datavalet*
 2. *Admin page*
 3. *CI section page*
 4. *Standard page with have offer text to identify expected details - TBD*
 5. *Due date selection page*
 3. Rate categorie : waiting for L3 management
 4. SLA : depends on rate categorie
 5. Classification : new if required to be created by maximo
 1. Auto create change / flowthrough
 2. use existing functionality with BBSSC like 41200340
 6. Type : minor
 3. Change offering MERAKI_113 to remove "an URL" "un URL"
3. Managed Infrastructure Services « Network »
 1. Respect filter that Bell offering will **NOT** show on CI page device managed by DATAVALET
 2. Remove SD-Wan offering
 3. Maintain the other MISN offering that are already there

Active PI:

Active PI

Approvals:**Benefit Hypothesis:**

This is required as a pre-requisite to Go Live with the Service Provisioning API (as completed in the 3rd party API project).
Allow Mcdonald to use BBSSC as a single plateforme to submit request

Calculated Feature Estimate:

19

Calculated Feature Estimate (scripted):

19.0

Closed PI:[BBMSA-2025-PI3](#)**Cost Of Delay:**

0.0

Description for Import:

Feature Description/Requirements (Current vs. Expected situation):

Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS. They will be reorganize in a customer friendly mather.

A unique PARBAC role will be kept to provide permission to customer to submit orders with existing NSMIS already used for catalog MCD

look at reference : [^Vision Mcdo catalog before after-1.vsdX]+ [^Mcdo meraki catalog.xlsx]

```

# Datavalet
## Reorganisation of offering following file
### Show *offers datavalet tagged as "Meraki Wi-Fi" only* under "Managed Services" "Bell Managed Services for Cisco Meraki" "Wi-fi"
### Show offers Datavalet tagged as "MIS Battery (NSMIS)" *only* under "Managed Services" "{*}Managed Infrastructure Services{*}" "Power supplies or battery backup" _(best naming to define ATS / UPS by UX for customer)_
### Do not show the other existing offers anywhere else
### Respect filter that Datavalet offering will only show on CI page device managed by DATAVALET
### Any existing structured form will work as is
## New offering : -Modify profile / template- -> *Transfert site to another template (profile)*
### Rate categorie : 1
### SLA : depends on rate categorie
### Classification : new to be created by maximo
### Process with BBSSC and API : MACD same as DV-002
### Type : minor
## New offering : Create new profile / template
### Rate categorie : -1 -> *3*
### SLA : depends on rate categorie
### Classification : new to be created by maximo
### Process with BBSSC and API : MACD same as DV-002
### Type : minor
## Adjust offering name for Mcdo and all on DV-047 to show "Ad Hoc report or dashboard customization"
## Internal use offer (must not show in BBSSC)
### WAN Site/Hardware decommission (with Physical Removal from Bell) : DV-043
### Add a new managed element - new location : DV-046
# Bell Managed Services for Cisco Meraki
## ADD meraki offering available to EC from Managed WAN and Managed LAN catalog to MCD catalog, expect MERAKI_113 in order to allow the customer to submit request for those existing meraki managed by bell offering
## Respect filter that Bell offering will {*}{*}{*}NOT{*}{*}{*} show on CI page device managed by DATAVALET
## add a New offering : Modify profile / template
### Rate categorie : Type 1
### SLA : use existing for Type 1
### Classification : create new one under the Meraki offering tree like 41200340
#### Auto create change / flowthrough
#### use existing functionality with BBSSC like 41200340
### Type : minor
## Change offering MERAKI_113 to remove "an URL" "un URL"
# Managed Infrastructure Services « Network »
## Respect filter that Bell offering will {*}{*}{*}NOT{*}{*}{*} show on CI page device managed by DATAVALET
## Remove SD-Wan offering
## Maintain the other MISN offering that are already there
*How Will We Test the Feature?*
Miipe
* test the new catalogue and validate regression of the datavalet API related it's corresponding offering
_ *Do We Have a Pre-Prod Environment to Test Against?* _
**
*Do the Developers Have a Development Environment?*
**
*Potential Risks That Could Impede Delivery:*
_ work with datavalet and Eside to share the new information in the API_
*Lead BA / E2E Solution Owner:*
Emily Crawford
*Stakeholder involvement:*
_ Datavalet, MSCC, L3 Bell, Mcdonalds_

```

	Why It Needs to Be Done in the Next PI: _CSAP mcdonalds and NPI pending to use catalog for over a year. Customer complaints need to solve ASAP_ *Additional details:* _see attachement_ *Out of Scope:* _Self explanatory_

 3. Maintain the other MISN offering that are already there

How Will We Test the Feature?

Miipe

- test the new catalogue and validate regression of the datavalet API related it's corresponding offering

Do We Have a Pre-Prod Environment to Test Against?

#

Do the Developers Have a Development Environment?

#

Potential Risks That Could Impede Delivery:

work with datavalet and Eside to share the new information in the API

Lead BA / E2E Solution Owner:

Emily Crawford

Stakeholder involvement:

Datavalet, MSCC, L3 Bell, Mcdonalds

Why It Needs to Be Done in the Next PI:

CSAP mcdonalds and NPI pending to use catalog for over a year. Customer complaints need to solve ASAP

Additional details:

see attachement

Out of Scope:

Self explanatory

Comments

Beaudoin, Olivier added a comment - 26/May/25 5:17 PM

[Lacroix, Louise](#), [Portugais, Sylvain](#), [Mandavilli, Swetha](#) can you please confirm if the Datavalet, Bell Managed Services for Cisco Meraki, Managed Infrastructure Services « Network » related offerings will all be included in a single new custom catalogue for Mcdonalds? If yes, I also assume that we have to remove their access to the following catalogs:

- mx_DATAVALET
- mx_MANAGED LAN
- mx_MANAGED WAN
- mx_MIS

And we will also remove their access to the following service groups:

- MISN
- MERAKI

Therefore, the customer will have the following setup:

- Service group: NSMIS
- Catalogue: mx_nametobeconfirmed

Lacroix, Louise added a comment - 30/May/25 3:56 PM

hi [Beaudoin, Olivier](#), following the discussion we had on the 29th here is the answer. I will update the comment with the text below. Let me know if this need to be adjusted :

"Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS. They will be reorganize in a customer friendly mather.

A unique PARBAC role will be kept to provide permission to customer to submit orders with existing NSMIS already used for catalog MCD"

Beaudoin, Olivier added a comment - 17/Jul/25 9:45 AM

[Mandavilli, Swetha](#) similar to what you did for ADM, can you please share the new vs previous offering ID? This will help us to duplicate the form

Crawford, Emily added a comment - 22/Jul/25 9:12 AM

Testing dependent on BBMOMNI feature (PI4)

[BBMOMNI-2951](#) My Request - McDonalds - CR8 Custom Catalog Restructuring & Enhancement - DOQ JIRA

Mandavilli, Swetha added a comment - 23/Jul/25 2:30 PM

[Beaudoin, Olivier](#)

For McDonalds we did not clone from existing offering we just created new Offerings with new naming conventions and classifications.

[Crawford, Emily](#)

How can we progress on this feature and close this as we have committed the feature PI3?

Beaudoin, Olivier added a comment - 23/Jul/25 2:48 PM

[Mandavilli, Swetha](#) same thing for us since we will duplicate the existing forms. Can you share the before/new offering I can copy/paste (updated Excel?) ? instead of images like this in the story

Mouaffo, Gilberte added a comment - 24/Jul/25 2:40 PM

[Benmessaoud, Samy](#) This is a committed feature for PI3 blocked by an OMNI feature. Can you please have your feature completed asap so we can progress our testing? Thank you

Cc [Ivanov, Diana](#) [Sherriff, Mark](#)

Mandavilli, Swetha added a comment - 24/Jul/25 3:04 PM

[Beaudoin, Olivier](#)

Please refer to the attached "MCDO Offerings" and tab Basis. You can find the existing offering and new offering.

Marcoux, Etienne added a comment - 28/Jul/25 2:35 PM

[Lacroix, Louise](#) peux tu clarifier ici svp; Dans ta description je vois 2 nouveaux formulaires:

1. 1. New offering : ~~Modify profile / template~~ -> **Transfert site to another template (profile)**
1. 1. 1. Rate categorie : 1
2. SLA : depends on rate categorie
3. Classification : new to be created by maximo
4. Process with BBSSC and API : MACD same as DV-002
5. Type : minor
2. New offering : Create new profile / template
1. Rate categorie : ~~1~~ -> **3**
2. SLA : depends on rate categorie
3. Classification : new to be created by maximo
4. Process with BBSSC and API : MACD same as DV-002
5. Type : minor

Dans le fichier Excel attaché MCDO Meraki catalog, ceux qui sont en vert (New) ne sont pas les mêmes que dans la description.

Ca prendrais aussi quel Offering ID je dois utiliser pour ces nouveaux formulaires

Lacroix, Louise added a comment - 28/Jul/25 4:59 PM

Salut [Marcoux, Etienne](#) , j'ai eu des difficultés avec les puces de Jira, je viens de corriger.

- le point 1.2 : créer une nouvelle offres pour les meraki Wifi. l'offre s'intitulera Transfert site to another template (profile) afin d'être plus clair pour le client et bell. = MCDO-03
 - La page "Technical details" doit contenir :
 - Customer References #
 - Transfert site to template / profile -> (drop down from DATAVALET - en attente de revision ç-dessous)

Count	Template Name

 - MCD-GW4-STR-TYPE-B
- • • Request details -> (optionnel)

Marcoux, Etienne added a comment - 29/Jul/25 9:44 AM

[Lacroix, Louise](#) merci

MCDO-04 Swetha dit de créer le ce formulaire à partir de DV-043 qui est s'appel: Remove feature or configuration to managed element - Remove device from management (whith physical removal from Bell)

MCDO 04 doit s'appeler "Create new profile / template", comment est-ce possible de Créer un nouveau profile sous l'action ``Remove`` ? Ca ne dervrait pas être sous ``Admin`` ? Si c'est plus simple de booker un work session de 1h et de les repasser ensemble, je peux le faire. Il semble avoir beaucoup de confusion.

Sherriff, Mark added a comment - 12/Aug/25 2:26 PM

Test team uncommitting to this feature due to dependency on Omni train. team will still work on feature but not as committed.

Sherriff, Mark added a comment - 14/Aug/25 9:14 AM

[Mouaffo, Gilberte](#) [Mandavilli, Swetha](#) [Mathur, Akhilesh](#) Test team flagged this one as uncommitted due to the dependency on OMNI train but i see it is flagged as a committed feature

Lacroix, Louise added a comment - 18/Aug/25 11:34 AM

Hi [Mandavilli, Swetha](#), BBSSC team raised me an issue, a new catalog MCDO was created instead of updating the existing MCD catalog.

please refer to description of the epic : "Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS."

This impact their developpement, can you please check with the developer to fix this please ASAP.

Thank you

[Crawford, Emily](#) [Portugais, Sylvain](#) [Beaudoin, Olivier](#)

Crawford, Emily added a comment - 19/Aug/25 3:17 PM

Meeting notes Aug 19

Current gap: a new catalogue was created and mapped in Maximo (MCDO).

1. The correct approach is to modify the existing catalogue, not create a new one.
2. Swetha will deactivate the new catalogue and remap all new offerings to the existing (MCD).
 1. We will leave MNPS as is, no change.
3. [@Mandavilli, Swetha](#)  once complete, please reply all.
4. [@Villemin, Maxime](#)  will continue his development from here once he can validate / test that what he's already done is accurate and working.
5. Miipe E2E / UAT to follow.

Going forward, we will have only two catalogues for McDonalds.

1. MCD
2. MNPS

Vera, Leonardo added a comment - 10/Sep/25 3:21 PM

E2E execution is currently blocked due to the dependent feature [BBMOMNI-2951](#) is not ready for testing.

Mandavilli, Swetha added a comment - 06/Oct/25 4:08 PM

Moved the feature back to Developing as MCDO-03 to MCDO-056 all these offerings are clone to DV offerings and they should be enabled for Datavalet API flow.

CC [Vera, Leonardo](#), [Portugais, Sylvain](#), [Lacroix, Louise](#), [Gheorghian, Ruxandra](#)

Lacroix, Louise added a comment - 23/Oct/25 9:57 AM

Following a session with [Mandavilli, Swetha](#) [Beaudoin, Olivier](#) and [Marcoux, Etienne](#) I added in the requirement the below statement to reflect the expectation that is showing in that original file [Mcdo meraki catalog.xlsx](#) 

2. Bell Managed Services for Cisco Meraki

1. ADD meraki offering available to EC from Managed WAN and Managed LAN catalog to MCD catalog, expect MERAKI_113 in order to allow the customer to submit request for those existing meraki managed by bell offering

2. Respect filter that Bell offering will ~~NOT~~ show on CI page device managed by DATAVALET

FYI - [Vera, Leonardo](#)

Miah, Nafio added a comment - 08/Jan/26 2:28 PM

E2E: Blocked as we wait for an update on [SADRSTRANG-13583](#). E2E Test Cases are done executing. UAT involving Datavalet: Additional scenario to be added and testing sessions to be planned.

Brief Project Description: There needs to be
 modifications in production to the existing MACD
 (SR) catalogue for McDonalds / Data Valet. We
 are removing offerings, adding offerings and
 making modifications to existing.

This is required as a pre-requisite to Go Live with
 the Service Provisioning API (as completed in the
 3rd party API project).

Brief Project Description: There needs to be
 modifications in production to the existing MACD
 (SR) catalogue for McDonalds / Data Valet. We
 are removing offerings, adding offerings and
 making modifications to existing.

Creation of 2 new Mcdonald custom catalog

- Datavalet
 - Creation of 2 new offering under WIFI
 - Modify profile / template

#	Question	Principle Why?	Comment	Project Specific answers comment
1	Is this a CSAP or an NPI ? What is the base MS product (in case of CSAP)?	We need to understand the non-standard requirement for CSAPs	Please list all non-standard requirement that deviate from the base MS product	CSAP MISN MISW
2	Is this for a new MS product introduction Or for replacement of an existing product Or is this for a new feature	All MS product must follow same existing solution from ordering in Day 0 to Service Provisioning in Day 2.	• Product should be launched nationally for Bell in the West Central and Atlantic	This request is for modification of the existing MACD (SR) Catalog that exists today for McDonalds

Create new profile / template

- filter CI managed by Datavalet
- Admin page
- CI section page
- Standard page with wording
- Due date selection page Available under Meraki WIFI
- Internal use of 2 offerings (not visible in BBSSC)
- DV-046 and DV-043
- Add visibility 2 offerings under WIFI
- DV-045 and DV-042
- Offering : Ad Hoc / dashboard customization (check with Rodrigo is we should change for any customer)
- Dispatcher
- MIS
- Creation of 2 new offering under WIFI

 5. Internal use offer (must not show in BBSSC)
 1. WAN Site/Hardware decommission (with Physical Removal from Bell) : DV-043
 2. Add a new managed element - new location : DV-046
 2. Bell Managed Services for Cisco Meraki
 1. Respect filter that Bell offering will `{NOT}` show on CI page device managed by DATAVALET
 2. New offering : Modify profile / template
 1. Taxonomie dispatcher
 1. "Managed Services" "Bell Managed Services for Cisco Meraki"
 2. "Bell Managed WAN" and "Bell Managed LAN"
 3. Action "Modify"
 2. Form
 1. *CI selection must NOT show CI managed by Datavalet*
 2. *Admin page*
 3. *CI section page*
 4. *Standard page with hove offer text to identify expected details - TBD*
 5. *Due date selection page*
 3. Rate categorie : waiting for L3 management
 4. SLA : depends on rate categorie
 5. Classification : new if required to be created by maximo
 1. Auto create change / flowthrought
 2. use existing functionality with BBSSC like 41200340
 6. Type : minor
 3. Change offering MERAKI_113 to remove "an URL" "un URL"
 3. Managed Infrastructure Services « Network »
 1. Respect filter that Bell offering will `{NOT}` show on CI page device managed by DATAVALET
 2. Remove SD-Wan offering
 3. Maintain the other MISN offering that are already there
- How Will We Test the Feature?**
- Miipe
- Do We Have a Pre-Prod Environment to Test Against?**
- #
- Do the Developers Have a Development Environment?**
- #
- Potential Risks That Could Impede Delivery:**
- work with datavalet and Eside to share the new information in the API*
- Lead BA / E2E Solution Owner:**
- Emily Crawford
- Stakeholder involvement:**
- Datavalet, MSCC, L3 Bell, Mcdonalds*
- Why It Needs to Be Done in the Next PI:**
- CSAP mcdonalds and NPI pending to use catalog for over a year. Customer complaints need to solve ASAP*
- Additional details:**
- see attachement*
- Out of Scope:**
- Self explanatory*

Lacroix, Louise made changes - 30/May/25 3:55 PM

Description

Feature Description/Requirements (Current vs. Expected situation):

Creation of new Mcdonald custom catalogs, they are 3 parts

look at reference : [Vision Mcdo catalog before after-1.vsd](#) + [Mcdo meraki catalog.xlsx](#)

1. Datavalet
 1. Reorganisation of offering following file

Feature Description/Requirements (Current vs. Expected situation):

Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS. They will be reorganize in a customer friendly mather.

1. Show **offers dataavalet tagged as "Meraki Wi-Fi" only** under "Managed Services" "Bell Managed Services for Cisco Meraki" "Wi-fi"
 2. Show offers Dataavalet tagged as "MIS Battery (NSMIS)" **only** under "Managed Services" **"Managed Infrastructure Services"** "Power supplies or battery backup" (*best naming to define ATS / UPS by UX for customer*)
 3. Do not show the other existing offers anywhere else
 4. Respect filter that Dataavalet offering will only show on CI page device managed by DATAVALET
 5. Any existing structured form will work as is
 2. New offering : Modify profile / template
 1. 1. Rate categorie : waiting for Dataavalet
 2. SLA : depends on rate categorie
 3. Classification : new to be created by maximo
 4. Process with BBSSC and API : MACD same as DV-002
 5. Type : minor
 2. New offering : Create new profile / template
 1. Rate categorie : waiting for Dataavalet
 2. SLA : depends on rate categorie
 3. Classification : new to be created by maximo
 4. Process with BBSSC and API : waiting for Dataavalet
 5. Type : minor
 3. Adjust offering name for Mcdo and all on DV-047 to show "Ad Hoc report or dashboard customization"
 4. Internal use offer (must not show in BBSSC)
 1. WAN Site/Hardware decommission (with Physical Removal from Bell) : DV-043
 2. Add a new managed element - new location : DV-046
 2. Bell Managed Services for Cisco Meraki
 1. Respect filter that Bell offering will **{NOT}** show on CI page device managed by DATAVALET
 2. New offering : Modify profile / template
 1. Rate categorie : waiting for L3 management
 2. SLA : depends on rate categorie
 3. Classification : new if required to be created by maximo
 1. Auto create change / flowthrough
- A unique PARBAC role will be kept to provide permission to customer to submit orders with existing NSMIS already used for catalog MCD
- look at reference : [Vision Mcdo catalog before after-1.vsd](#) + [Mcdo meraki catalog.xlsx](#)
1. Dataavalet
 1. Reorganisation of offering following file
 1. Show **offers dataavalet tagged as "Meraki Wi-Fi" only** under "Managed Services" "Bell Managed Services for Cisco Meraki" "Wi-fi"
 2. Show offers Dataavalet tagged as "MIS Battery (NSMIS)" **only** under "Managed Services" **"Managed Infrastructure Services"** "Power supplies or battery backup" (*best naming to define ATS / UPS by UX for customer*)
 3. Do not show the other existing offers anywhere else
 4. Respect filter that Dataavalet offering will only show on CI page device managed by DATAVALET
 5. Any existing structured form will work as is
 2. New offering : Modify profile / template
 1. 1. Rate categorie : waiting for Dataavalet
 2. SLA : depends on rate categorie
 3. Classification : new to be created by maximo

 2. Bell Managed Services for Cisco Meraki
 1. Respect filter that Bell offering will **{NOT}** show on CI page device managed by DATAVALET
 2. New offering : Modify profile / template

2. use existing functionality with BBSSC like 41200340
4. Type : minor
3. Change offering MERAKI_113 to remove "an URL" "un URL"
3. Managed Infrastructure Services « Network »
 1. Respect filter that Bell offering will {}
{}NOT{} show on CI page device managed by DATAVALET
 2. Remove SD-Wan offering
 3. Maintain the other MISN offering that are already there

How Will We Test the Feature?

Miipe

Do We Have a Pre-Prod Environment to Test Against?

#

Do the Developers Have a Development Environment?

#

Potential Risks That Could Impede Delivery:

work with datavalet and Eside to share the new information in the API

Lead BA / E2E Solution Owner:

Emily Crawford

Stakeholder involvement:

Datavalet, MSCC, L3 Bell, Mcdonalds

Why It Needs to Be Done in the Next PI:

CSAP mcdonalds and NPI pending to use catalog for over a year. Customer complaints need to solve ASAP

Additional details:

see attachement

Out of Scope:

Self explanatory

1. Rate categorie : waiting for L3 management
2. SLA : depends on rate categorie
3. Classification : new if required to be created by maximo
 1. Auto create change / flowthrought
 2. use existing functionality with BBSSC like 41200340
4. Type : minor
3. Change offering MERAKI_113 to remove "an URL" "un URL"
3. Managed Infrastructure Services « Network »
 1. Respect filter that Bell offering will {}
{}NOT{} show on CI page device managed by DATAVALET
 2. Remove SD-Wan offering
 3. Maintain the other MISN offering that are already there

Description	Feature Description/Requirements (Current vs. Expected situation):	Feature Description/Requirements (Current vs. Expected situation):
	Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS. They will be reorganize in a customer friendly mather. A unique PARBAC role will be kept to provide permission to customer to submit orders with existing NSMIS already used for catalog MCD look at reference : Vision Mcdo catalog before after-1.vsd + Mcdo meraki catalog.xlsx 1. Datavalet 1. Reorganisation of offering following file 1. Show offers datavalet tagged as "Meraki Wi-Fi" only under "Managed Services" "Bell Managed Services for Cisco Meraki" "Wi-fi" 2. Show offers Datavalet tagged as "MIS Battery (NSMIS)" only under "Managed Services" "Managed Infrastructure Services" "Power supplies or battery backup" (<i>best naming to define ATS / UPS by UX for customer</i>) 3. Do not show the other existing offers anywhere else 4. Respect filter that Datavalet offering will only show on CI page device managed by DATAVALET 5. Any existing structured form will work as is 2. New offering : Modify profile / template -> Transfert site to another template (profile) 1. Rate categorie : 1 2. SLA : depends on rate categorie 3. Classification : new to be created by maximo 4. Process with BBSSC and API : MACD same as DV-002 5. Type : minor 3. New offering : Create new profile / template 1. Rate categorie : 1-> 3 2. SLA : depends on rate categorie 3. Classification : new to be created by maximo 4. Process with BBSSC and API : MACD same as DV-002 5. Type : minor 4. Adjust offering name for Mcdo and all on DV-047 to show "Ad Hoc report or dashboard customization"	Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS. 5. Internal use offer (must not show in BBSSC)
 1. WAN Site/Hardware decommission (with Physical Removal from Bell) : DV-043
 2. Add a new managed element - new location : DV-046
2. Bell Managed Services for Cisco Meraki
 1. Respect filter that Bell offering will **{NOT}** show on CI page device managed by DATAVALET
 2. New offering : Modify profile / template
 1. Rate categorie : Type 1
 2. SLA : use existing for Type 1
 3. Classification : create new one under the Meraki offering tree like 41200340
 1. Auto create change / flowthrough
 2. use existing functionality with BBSSC like 41200340
 4. Type : minor
 3. Change offering MERAKI_113 to remove "an URL" "un URL"
3. Managed Infrastructure Services « Network »
 1. Respect filter that Bell offering will **{NOT}** show on CI page device managed by DATAVALET
 2. Remove SD-Wan offering
 3. Maintain the other MISN offering that are already there

How Will We Test the Feature?

Miipe

Do We Have a Pre-Prod Environment to Test Against?

#

Do the Developers Have a Development Environment?

#

Potential Risks That Could Impede Delivery:

work with datavalet and Eside to share the new information in the API

Lead BA / E2E Solution Owner:

Emily Crawford

Stakeholder involvement:

Datavalet, MSCC, L3 Bell, Mcdonalds

Why It Needs to Be Done in the Next PI:

CSAP mcdonalds and NPI pending to use catalog for over a year. Customer complaints need to solve ASAP

How Will We Test the Feature?

Miipe

- test the new catalogue and validate regression of the datavalet API related it's corresponding offering

1	TC 1 - Validating the MCDO-04 Offering for Heraki Wi-Fi (Standard) - Type 1	Validating the Service Request and Change Request details for the "MCDO-04: Create new profile / template" offering on Heraki	Add
2	TC 2 - Validating the MCDO-36 Offering for Heraki Wi-Fi (Standard) - Type 1	Validating the Service Request and Change Request details for the "MCDO-36 General inquiry" offering on Heraki	Administrative
3	TC 3 - Validating the MCDO-47 Offering for Heraki Wi-Fi (Standard) - Type 3	Validating the Service Request and Change Request details for the "M4 Hoc report or dashboard customisation" offering on Heraki	Administrative
4	TC 4 - Validating the MCDO-36 Offering for MIS Battery (Standalone) - Type 1	Validating the Service Request and Change Request details for the "MCDO-36 General inquiry" offering on Heraki	Administrative
5	TC 5 - Validating the MCDO-47 Offering for MIS Battery (Standalone) - Type 1	Validating the Service Request and Change Request details for the "M4 Hoc report or dashboard customisation" offering on Heraki	Administrative

Lacroix, Louise made changes - 23/Oct/25 9:55 AM

Description	Feature Description/Requirements (Current vs. Expected situation):	Feature Description/Requirements (Current vs. Expected situation):
	Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS. They will be reorganize in a customer friendly mather. A unique PARBAC role will be kept to provide permission to customer to submit orders with existing NSMIS already used for catalog MCD look at reference : Vision Mcdto catalog before after-1.vsd[📄] + Mcdto meraki catalog.xlsx[📄] 1. Datavalet 1. Reorganisation of offering following file 1. Show offers datavalet tagged as "Meraki Wi-Fi" only under "Managed Services" "Bell Managed Services for Cisco Meraki" "Wi-fi" 2. Show offers Datavalet tagged as "MIS Battery (NSMIS)" only under "Managed Services" "Managed Infrastructure Services" "Power"	Adjust the existing customized catalog MCD (actually used for security) to combine the offering the customer need from Datavalet, Managed LAN, Managed Wan and MIS. |--|---|

3. Maintain the other MISN offering that are already there

How Will We Test the Feature?

Miipe

- test the new catalogue and validate regression of the datavalet API related it's corresponding offering

Do We Have a Pre-Prod Environment to Test Against?

#

Do the Developers Have a Development Environment?

#

Potential Risks That Could Impede Delivery:

work with datavalet and Eside to share the new information in the API

Lead BA / E2E Solution Owner:

Emily Crawford

Stakeholder involvement:

Datavalet, MSCC, L3 Bell, Mcdonalds

Why It Needs to Be Done in the Next PI:

CSAP mcdonalds and NPI pending to use catalog for over a year. Customer complaints need to solve ASAP

Additional details:

see attachement

Out of Scope:

Self explanatory

4. Change offering MERAKI_113 to remove "an URL" "un URL"
3. Managed Infrastructure Services « Network »
 1. Respect filter that Bell offering will `{}` `{NOT}` show on CI page device managed by DATAVALET
 2. Remove SD-Wan offering
 3. Maintain the other MISN offering that are already there
